

ONTOR ANTIREFLEX

Universal eye protection

The ONTOR is the perfect over and visitor spectacles. The flexible temples adapt individually to every head shape. The soft pads protect against lateral and frontal impacts. Thanks to the individually adjustable temple length and inclination of the lens, the ONTOR can be adapted to any face shape and work situation.

Universal safety spectacles with super anti-reflective coating

The ONTOR - Antireflex with super anti-reflective coating is particularly suitable for use over prescription glasses. However, strong reflections can occur when used as over-glasses. The super anti-reflective coating reduces these annoying reflections and ensures fatigue-free working.
