

OPTOR / OPTOR PLUS

Innovative, with many adjustment options

The Softflex-Fit temples of the OPTOR are fully adjustable in length and at the end of the temple. In addition, the lens angle (the forward tilt of the lens) can be adjusted to suit any work situation.

The PLUS in safety

The OPTOR PLUS offers even more safety thanks to the additional adapter. The integrated rubber lip ensures a soft and comfortable contact surface. The adapter makes the OPTOR PLUS very tight-fitting and ideal for harsh industrial environments and heavily soiled working conditions.

OPTOR / OPTOR PLUS	28 g	GA 166 F T CE	Softflex Fit
