

OPTOR XXS / OPTOR XXS PLUS

Ideal for narrow face shapes

The OPTOR XXS is ideal for narrow faces. The Softflex-Fit temples are fully individually adjustable in length and at the temple end. In addition, the lens angle (the forward tilt of the lens) can be adjusted to suit any work situation.

The PLUS in safety

The OPTOR XXS PLUS offers even more safety thanks to the additional adapter. The integrated rubber lip ensures a soft and comfortable contact surface. The adapter makes the OPTOR XXS PLUS very tight-fitting and ideal for harsh industrial environments and heavily soiled working conditions.

OPTOR XXS / OPTOR XXS PLUS	24 g	GA 166 F T CE	Softflex Fit
Product	Weight	Frame marking	Temple technology
